02 Simple Practice Solution

section 1

SIMPLE PRACTICE

1.1. Drafting Sequence Diagrams - Simple Practice

```
public String orderProduct (String email, String pid, int qty)
    throws NoCustomerException, NoProductException {
```

```
    Customer c = findCustomer(email);
```

```
    if (c == null)
        throw new NoCustomerException (email);
```

```
    Product p = findProduct(pid);
```

```
    if (p == null)
        throw new NoProductException(pid);
```

```
    Order o = new Order(qty, p, c);
```

```
    orders.put(o.getOld(), o);
```

```
    return (o.getOld());
```

```
}
```

Draft a sequence diagram that maps to the given code of orderProduct() using all the relevant objects from the given class diagram.
